Madam, Sir,

Currently enrolled in the final year of my Engineering degree at École Supérieure Privée d'Ingénierie et de Technologie (ESPRIT), I am seeking a final year internship within your company to fulfill the academic requirements of my program.

I am particularly passionate about full-stack web development and specialize in Angular for frontend development and .NET for backend services. Additionally, I have strong skills in mobile application development using Flutter, NestJS, Android with Jetpack Compose, and SwiftUI. My experience includes building scalable web and mobile applications using Clean Architecture, MVVM patterns, and modern development practices to ensure maintainable and efficient code.

I am highly motivated and ready to contribute to your company not only during the internship period but also as a potential full-time employee afterward. I view this internship as an opportunity to demonstrate my commitment and capabilities, with the goal of continuing my professional journey within your organization upon graduation.

I would be honored to contribute to your team and learn within a professional and innovative environment. Please feel free to contact me for any further information. I look forward to the opportunity to collaborate with your organization.

Yours sincerely ,

Mahmoud Abid
